

CAPABILITY STATEMENT / 01

Remote aviation. Northern Australian experience.

DARWIN BASED • OVER 27 YEARS OF EXPERIENCE
Northern Territory & Queensland

Company Overview

Whitsunday Coast Helicopter Services (Rotor Services) is a highly experienced Australian helicopter operator specialising in remote-area aviation services throughout the Northern Territory and Queensland.

Based in Darwin, Rotor Services has extensive operational experience delivering aerial services in challenging environmental and remote operational conditions. The business is led by Adam Tessmann, who has over 27 years of experience delivering helicopter services for government, environmental, land management, mining, aerial application, and remote-area operations throughout Northern Australia.

Rotor Services has previously delivered services to the Department of Agriculture, Fisheries and Forestry and has extensive experience supporting government agencies, environmental programs, remote communities, and private sector clients. This operational background has provided the company with significant expertise in low-level flying, aerial application support, remote logistics, environmental management operations, and coordination with field-based stakeholders.

Rotor Services is committed to delivering safe, reliable, and efficient helicopter services tailored to the operational requirements of each client and project.

CAPABILITY STATEMENT / 02

Operational capability

Rotor Services can provide:

- Remote-area helicopter operations
- Low-level and precision flying operations
- Aerial application support
- Environmental and land management operations
- Mine site and resource sector support
- Aerial survey and inspection services
- Sling and external load operations
- Charter and personnel transfers
- GPS-guided operational support and tracking
- Daily operational and flight reporting
- Remote logistics and field support
- Coordination with ground crews and stakeholders

Operating environments

We have extensive experience operating in:

- Remote and environmentally sensitive areas
- Northern Territory and Queensland climatic conditions
- Mining and government operational environments
- Low-level and precision operational flying
- Isolated and logistically challenging locations

Our operational approach is built on safety, communication, reliability, and environmental responsibility.

CAPABILITY STATEMENT / 03

Experience & resources

Relevant Experience

Rotor Services has extensive experience undertaking helicopter operations across Northern Australia, including:

- Environmental and land management operations
- Aerial application support activities
- Aerial survey and monitoring operations
- Remote-area logistics support
- Government contract delivery
- Mine site operational support
- Coordination with Indigenous ranger groups and environmental stakeholders
- Operations throughout remote Northern Australian regions

Our Director and Chief Pilot has direct operational experience delivering large-scale environmental helicopter operations throughout Northern Australia, including long-term involvement in aerial baiting and environmental management programs from 2007 to 2019.

Our long-term experience operating in remote regions provides us with a strong understanding of:

- Remote operational planning
- Environmental compliance requirements
- Seasonal and weather-related operational constraints
- Safe coordination with ground support teams
- Efficient project delivery in isolated areas

Personnel & Resources

Rotor Services is led by Adam Tessmann, Chief Executive Officer and Chief Pilot, supported by an experienced operational team and growing workforce committed to delivering safe and professional helicopter services.

Our personnel are experienced in:

- Low-level aerial operations
- Remote-area flying
- Environmental and aerial application operations
- Operational risk management
- Stakeholder and ground crew coordination
- Remote logistics and field support

We maintain a fleet of helicopters suitable for remote operational work, aerial application support, charter operations, and project-based aviation activities.

CAPABILITY STATEMENT / 04

Safety & collaboration

Safety & Compliance

Safety is central to all Rotor Services operations.

Our systems and operational procedures include:

- CASA compliant Air Operator Certificate (AOC)
- Safety Management System (SMS)
- Drug and Alcohol Management Program (DAMP)
- Risk assessment and hazard management procedures
- Aircraft maintenance management systems
- Pilot competency and recurrent training programs
- Emergency response procedures
- Environmental management practices
- Fatigue management systems
- Operational and maintenance compliance monitoring

Rotor Services is committed to maintaining the highest standards of aviation safety, operational compliance, and environmental responsibility.

We understand the importance of maintaining strong communication, planning, and operational discipline when working within remote, mining, environmental, and government operational environments.

Indigenous & Stakeholder Engagement

Rotor Services has extensive experience working collaboratively with:

- Indigenous Ranger groups
- Government agencies
- Environmental management teams
- Mining and resource sector clients
- Remote landholders and communities

We understand the importance of respectful engagement, clear communication, and collaborative operational planning to ensure successful project outcomes.

Safety. Communication. Reliability.
Environmental responsibility.

CAPABILITY STATEMENT / 05

Why Rotor Services

Rotor Services is uniquely positioned to support clients across Northern Australia through:

- Over 27 years of Northern Australian helicopter operational experience
- Extensive remote-area aviation capability
- Proven government, environmental, and mining sector experience
- Experienced pilots and operational personnel
- Strong safety culture and compliance systems
- Darwin-based operational support
- Reliable and flexible service delivery capability
- Strong understanding of remote logistics and environmental operations

Our operational experience, local knowledge, and commitment to safe and efficient project delivery provide clients with confidence in our ability to successfully deliver professional helicopter services across a wide range of operational environments.
